ADOLOGY INTELLIGENCE API

Competitive intelligence infrastructure for agents, dashboards, and creative tools

---

Build Smarter Creative Tools

Your briefing bots need competitive context. Your dashboards need real-time intelligence. Your agents need to answer "what's working?" with data, not guesses.

We provide the infrastructure:

We Handle	So You Can
Aggregation — Meta Ads, TikTok, Instagram, YouTube, Reddit, Twitter, LinkedIn	Query one API, get all platforms
Extraction — 200+ analysis fields on every item	Skip the ML pipeline, use our analysis
Labeling — Your taxonomies applied at scale	Analyze data through your frameworks
Statistics — Distributions, indices, trends computed	Power dashboards without data engineering
Provenance — Every insight links to source items	Make every recommendation provable

---

The Four Voices

All intelligence organized into four streams. Each answers a different strategic question:

Voice	Strategic Value	Data Sources	Status
Category	Best practices, competitive gaps, whitespace, threats & opportunities	Brand ads (Meta, TikTok, Instagram, YouTube), organic social	✅ Available
Culture	Trend signals, emerging formats, cultural relevance, timing	Influencers, Reddit, Twitter, search trends	✅ Available
Customer	Pain points, praise triggers, true needs, language patterns	Ad comments, reviews, brand mentions	➡️ SOON Late Jan 2026
Performance	What's converting, efficiency by creative, optimization paths	Your ad account APIs (Meta, TikTok, Google)	➡️ SOON Feb 2026

The power is in combining them. Category tells you what competitors do. Culture tells you what's relevant now. Customer tells you what people actually want. Performance tells you what converts.

Your agent calls all four, synthesizes the answer, and shows its work.

Four Levels of Access

Tier	You Send	You Get	Best For
1: Raw Data	Filters	Items with all 200+ fields	Data science, custom ML, proprietary pipelines
2: Intelligence	Voice + query type + filters	Stats, comparisons, gaps, trends with examples	Dashboards, analysis tools, agent context
3: Our Agent	Question in plain English	Answer with evidence, recommendations	Brief builders, Q&A interfaces, creative assistants
4: Your Agent	Configuration	Hosted bot with your prompts, your rules	White-label, custom workflows

Each tier includes everything below it. Tier 3 customers can still make Tier 2 queries for raw stats.

Tier 1: Raw Data

What it is: Every item we've scraped with all 200+ extracted fields. No aggregation, no interpretation—just the data.

Best for: Data science teams building custom models, training data for your own ML, proprietary analysis pipelines.

Endpoint

```
POST /api/v1/data/items
```

Request

```json
{
  "knowledgeSetId": "ks_abc123",
  "filters": {
    "brands": ["Nike", "Adidas"],
    "platforms": ["facebook-ad-library", "tiktok-profile"],
    "dateRange": {"start": "2025-10-01", "end": "2025-12-31"},
    "labels": {
      "HookPrimaryCategory": ["Challenge/Participation", "Product Demo"]
    },
    "minPersistence": 14,
    "minEngagement": 10000
  },
  "fields": ["*"],
  "sort": {
    "by": "persistence",
    "order": "desc"
  },
  "limit": 100,
  "offset": 0
}
```

Response

```json
```

```
{
  "items": [
    {
      "id": "item_abc123",
      "url": "https://facebook.com/ads/library/?id=123456789",

}
}
```

Filter Options

Filter	Type	Description
`brands`	string[]	Filter to specific brands
`platforms`	string[]	`facebook-ad-library`, `tiktok-profile`, `instagram-profile`, `youtube-channel`, `twitter-handle`, `reddit-subreddit`, `linkedin-company`
`dateRange`	object	`{start, end}` or `{last: "30d"}`
`labels`	object	Filter by any dimension: `{"HookPrimaryCategory": ["Demo", "UGC"]}`
`minPersistence`	number	Minimum days active
`minEngagement`	number	Minimum total engagement
`search`	string	Full-text search in captions

Field Selection

Request only the fields you need:

```json
{
  "fields": [
    "id", "url", "brand", "caption",
    "metrics.persistence", "metrics.views",
    "analysis.Hook", "analysis.EmotionalContent"
  ]
}
```

Tier 2: Intelligence

What it is: Statistics, comparisons, gaps, and trends—computed for you. Query any voice, get back analyzed data with provenance.

Best for: Dashboards, analysis tools, feeding context into your own agents and systems.

The Query Pattern

Every intelligence query follows the same structure:

```json
{
  "knowledgeSetId": "ks_abc123",
  "voice": "category | culture | customer | performance",
  "query": {
    "type": "distribution | compare | gaps | whitespace | trends | crossDimension | label | topItems",
    /* query-specific parameters */
  },
  "filters": { /* scope the data */ },
  "includeExamples": true,
  "examplesPerGroup": 3
}
```

Voice of Category

What it gives you: Best practices, competitive gaps, whitespace, threats, opportunities.

Data sources: Brand ads (Meta Ad Library, TikTok, Instagram, YouTube), organic social content.

Example: "What hooks are competitors using and how do they perform?"

```
POST /api/v1/intelligence
```

```json
{
  "knowledgeSetId": "ks_abc123",
  "voice": "category",
  "query": {
    "type": "distribution",
    "dimension": "HookPrimaryCategory",
    "metrics": ["count", "share", "performanceIndex", "avgPersistence"]
  },
  "filters": {
    "brands": ["Nike", "Adidas", "Puma"],
    "platforms": ["facebook-ad-library"],
    "dateRange": {"last": "90d"}
  },
  "groupBy": "brand",
  "includeExamples": true,
  "examplesPerGroup": 2
}
```

Response:

```json
```

```
{
  "voice": "category",
  "queryType": "distribution",
  "dimension": "HookPrimaryCategory",

  "results": {
    "Nike": {
      "totalItems": 342,
      "distribution": [
        {
          "label": "Challenge/Participation",
          "count": 89,
          "share": 0.26,
          "performanceIndex": 2.1,
          "avgPersistence": 34.2,
          "trend": {
            "vsLastPeriod": "+12%",
            "direction": "rising"
          },
          "examples": [
            {
              "id": "item_abc",
              "url": "https://facebook.com/ads/library/?id=123",
              "thumbnailUrl": "https://cdn.adology.com/thumbs/abc.jpg",
              "caption": "Can you do this? 🔥 ",
              "persistence": 45,
              "engagement": {"views": 2400000, "shares": 89000}
            },
            {
              "id": "item_def",
              "url": "https://facebook.com/ads/library/?id=456",
              "thumbnailUrl": "https://cdn.adology.com/thumbs/def.jpg",
              "caption": "Show us your best move",
              "persistence": 38,
              "engagement": {"views": 1800000, "shares": 67000}
            }
          ]
        },
        {
          "label": "Product Demo",
          "count": 67,
          "share": 0.20,
          "performanceIndex": 0.94,
```

```
      "avgPersistence": 22.1,
      "trend": {
        "vsLastPeriod": "-3%",
        "direction": "stable"
      },
      "examples": []
    },
    {
      "label": "Transformation/Before-After",
      "count": 52,
      "share": 0.15,
      "performanceIndex": 1.8,
      "avgPersistence": 31.5,
      "trend": {
        "vsLastPeriod": "+8%",
        "direction": "rising"
      },
      "examples": []
    }
  ]
},
"Adidas": {
  "totalItems": 287,
  "distribution": [
    {
      "label": "Product Demo",
      "count": 118,
      "share": 0.41,
      "performanceIndex": 1.32,
      "avgPersistence": 26.3,
      "examples": []
    },
    {
      "label": "Technical Authority",
      "count": 72,
      "share": 0.25,
      "performanceIndex": 1.15,
      "avgPersistence": 24.1,
      "examples": []
    }
  ]
},
"Puma": {
  "totalItems": 198,
```

```
    "distribution": []
  }
},

"insights": {
  "topPerformer": {

        {"brand": "Adidas", "share": 0.07}
      ],
      "insight": "You have zero BTS content. Competitors average 8% with 1.6x performance index.",
      "opportunity": "HIGH - Proven pattern you're completely missing",
      "examples": []
    },
    {
      "label": "User Testimonial",
      "yourCount": 0,
      "yourShare": 0,
      "benchmarkShare": 0.05,
      "benchmarkIndex": 1.9,
      "usedBy": [{"brand": "Adidas", "share": 0.05}],
      "insight": "Adidas runs testimonials at 5% share with 1.9x index. You have none.",
      "opportunity": "MEDIUM - Lower volume but high performance"
    }
  ],

  "provenance": {}
}
```

Voice of Culture

What it gives you: Trend signals, emerging formats, cultural relevance, timing opportunities.

Data sources: Influencer content, Reddit discussions, Twitter conversations, search trends.

Example: "What's trending right now?"

```json
{
  "knowledgeSetId": "ks_abc123",
  "voice": "culture",
  "query": {
    "type": "trends",
    "find": "rising",
    "dimension": "HookPrimaryCategory",
    "period": "30d",
    "minVelocity": 0.2
  },
  "filters": {
    "sources": ["influencers", "reddit", "twitter"]
  }
}
```

Response:

```json
```

```
{
  "voice": "culture",
  "queryType": "trends",
  "period": "30d",

  "rising": [
    {
      "label": "Secret Menu Hacks",
      "currentShare": 0.12,
      "priorShare": 0.03,
      "velocity": "+300%",
      "velocityRaw": 3.0,
      "performanceIndex": 18.5,
      "signal": "VIRAL SPIKE",
      "context": {
        "why": "Combines exclusivity psychology with FOMO. Viewers feel like insiders.",
        "where": "Started on TikTok food creators, spreading to brand content",
        "who": "Led by @foodtiktok, @secretmenus, picked up by Chipotle and Starbucks"
      },
      "timing": "Act now - typically 2-3 week window before saturation",

    "itemsAnalyzed": 12847,
    "period": {"start": "2025-12-01", "end": "2025-12-31"}
  }
}
```

Example: "What are influencers doing in our category?"

```
json
```

```
{
  "knowledgeSetId": "ks_abc123",
  "voice": "culture",
  "query": {
    "type": "distribution",
    "dimension": "HookPrimaryCategory",
    "metrics": ["count", "share", "avgEngagement"]
  },
  "filters": {
    "sources": ["influencers"],
    "categories": ["fitness", "athletic"],
    "dateRange": {"last": "30d"}
  }
}
```

Voice of Customer

What it gives you: Pain points, praise triggers, true needs, language patterns.

Data sources: Ad comments, product reviews, Reddit brand mentions, Twitter conversations.

Available late January 2026

Example: "What are customers complaining about?"

```json
{
  "knowledgeSetId": "ks_abc123",
  "voice": "customer",
  "query": {
    "type": "sentiment",
    "find": "painPoints",
    "groupBy": "theme"
  },
  "filters": {
    "brands": ["Nike"],
    "sources": ["adComments", "reviews", "reddit"],
    "dateRange": {"last": "90d"}
  }
}
```

Response:

```
json
```

```
{
  "voice": "customer",
  "queryType": "sentiment",
  "sentimentType": "painPoints",

  "results": [
    {
      "theme": "Sizing Issues",
      "frequency": 0.23,
      "volume": 1247,
      "avgSentiment": -0.72,
      "trend": "+5%",
      "insight": "Sizing is #1 complaint. 23% of negative feedback mentions fit issues.",

Putting It All Together: The Four Voices Combined

Here's the real power—combining all four voices to build comprehensive intelligence.

Scenario: You're preparing creative recommendations for an athletic footwear brand.

Call 1: Category - Competitive Landscape

```json
{
  "voice": "category",
  "query": {
    "type": "gaps",
    "focalBrand": "Puma",
    "benchmark": ["Nike", "Adidas"],
    "dimension": "HookPrimaryCategory"
  }
}
```

Key finding: Puma under-indexes on Challenge/Participation hooks (8% vs 22% benchmark) despite 2.1x performance index.

Call 2: Culture - What's Relevant Now

```json
{
  "voice": "culture",
  "query": {
    "type": "trends",
    "find": "rising",
    "dimension": "HookPrimaryCategory"
  }
}
```

Key finding: "Transformation/Before-After" is rising (+89% velocity) with 8.7x performance. Authenticity-focused formats winning.

Call 3: Customer - What People Actually Want

```json
```

```
{
  "voice": "customer",
  "query": {
    "type": "sentiment",
    "find": "painPoints"
  },
  "filters": {
    "brands": ["Puma", "Nike", "Adidas"]
  }
}
```

Key finding: Sizing is #1 pain point (23% of complaints). Price sensitivity rising (+12%). Customers love style/design (31% of praise).

Call 4: Performance - What Actually Converts

```
{
  "voice": "performance",
  "query": {
    "type": "distribution",
    "dimension": "HookPrimaryCategory",
    "metrics": ["roas", "cpa"]
  }
}
```

Key finding: Challenge hooks drive 4.2x ROAS vs 1.4x for Lifestyle. Transformation content at 3.8x ROAS.

Your Agent Combines Them:

```
┌─────────────────────────────────────────────────────────────┐
│ STRATEGIC RECOMMENDATION                                    │
├─────────────────────────────────────────────────────────────┤
│                                                             │
│ PRIMARY OPPORTUNITY: Challenge/Participation Hooks          │
│                                                             │
│ Category: You're at 8% vs 22% benchmark. Nike owns this at 2.1x index.  │
│ Culture: Authenticity formats rising. Challenge + UGC is the moment.     │
│ Customer: Leverage style/design praise. Address sizing in creative.      │
│ Performance: Challenge hooks = 4.2x ROAS. Your highest efficiency format. │
│                                                             │
```

```
RECOMMENDATION: Increase Challenge content from 8% to 25% of mix.
Combine with UGC-style execution. Lead with style/design. Include fit guide.

EXPECTED IMPACT: +35% blended ROAS based on reallocation model.

EVIDENCE:
• 827 competitor ads analyzed (Category)
• 12,847 cultural signals tracked (Culture)
• 5,420 customer comments analyzed (Customer)
• 47 ads in your account measured (Performance)
```

This is what you can build. Four voices, combined, with full provenance.

Tier 3: Our Agent

What it is: Ask questions in plain English. We query the right voices, combine the data, and give you answers with evidence.

Best for: Brief builders, creative assistants, Q&A interfaces, quick insights.

This is MCP access to our intelligence agent. You talk, it handles everything.

    {
      "name": "POV Reactions",
      "score": 78,
      "oneLiner": "Relatable energy moments. Strong identification, 11.2x engagement.",
      "exampleUrl": "https://tiktok.com/..."
    }
  ],
  "avoidHook": "Lifestyle Aesthetic - 0.8x ROAS, declining -47%"
}
```

We fill your exact structure with our intelligence.

Tier 4: Your Agent

What it is: Our intelligence, your bot. A hosted agent configured with your system prompts, brand context, default behaviors, and guardrails.

Best for: White-label solutions, custom workflows, proprietary assistants.

Delivery Options

Option A: MCP Server

Connect via Model Context Protocol:

```
json
```

```
{
  "mcp_servers": [
    {
      "type": "url",
      "url": "https://mcp.adology.com/v1/agents/{your-agent-id}/sse",
      "name": "your-creative-intelligence"
    }
  ]
}
```

Option B: Dedicated API

```
POST https://api.adology.com/v1/agents/{your-agent-id}/ask
```

Same interface as Tier 3, but with your configuration applied.

Configuration

```
json
```

```
{
  "agentId": "agent_acme_creative",
  "name": "Acme Creative Intelligence",

  "systemPrompt": "You are a senior creative strategist for Acme Corp. Ground every recommendation in data. Be specific wit

  "defaultContext": {
    "knowledgeSetId": "ks_acme_competitive",
    "focalBrand": "Acme",
    "competitors": ["Competitor A", "Competitor B", "Competitor C"],
    "voices": ["category", "culture", "customer"],
    "platforms": ["tiktok", "instagram", "facebook"]
  },

  "defaultSchemas": {
    "briefValidation": {
      "score": "number",
      "verdict": "string",
      "topOptimization": "string",
      "predictedLift": "string"
    },
    "hookRecommendation": {
      "recommended": ["string"],
      "avoid": ["string"],
      "rationale": "string"
    }
  },

  "outputDefaults": {
    "includeExamples": true,
    "examplesPerInsight": 2,
    "includeDataBacking": true,
    "maxResponseLength": 500,
    "confidenceThreshold": "high"
  },

  "guardrails": {
    "neverMention": ["internal pricing", "unreleased products", "competitor names in recommendations"],
    "alwaysInclude": ["evidence links", "confidence level", "next steps"],
    "toneGuide": "Confident but not arrogant. Data-driven. Action-oriented."
  },

  "customLabels": [
```

```
    {
      "name": "AcmeBrandVoice",
      "labels": ["Bold Innovator", "Trusted Expert", "Friendly Guide"]
    },
    {
      "name": "AcmeCampaignType",
      "labels": ["Awareness", "Consideration", "Conversion", "Retention"]
    }
  ]
}
```

Your agent, your rules, our intelligence infrastructure.

Query Type Reference

All Available Query Types

Query Type	Question It Answers	Key Parameters
distribution	How is this dimension distributed?	dimension, metrics, groupBy
compare	How do entities differ on a dimension?	entities, dimension
gaps	Where are we under-indexed vs benchmark?	focalBrand, benchmark, dimension
whitespace	What do competitors do that we don't?	focalBrand, benchmark, dimension
trends	What's rising, falling, emerging?	find, dimension, period
crossDimension	How do two dimensions interact?	dimensions, metric
label	Apply custom taxonomy and analyze	define, applyTo, analyze
topItems	Show best performers	sortBy, limit, filters
sentiment	What are customers saying? (Customer voice)	find, groupBy

---

Quick Reference

Which Tier?

I want to...	Start Here
Build custom ML models on competitive data	**Tier 1**
Power dashboard cards with stats	**Tier 2**
Feed context into my own agent's prompts	**Tier 2**
Let users ask questions and get answers	**Tier 3**
Ship a white-label intelligence product	**Tier 4**

Which Voice?

I want to know...	Query This Voice
What competitors are doing	**Category**
Where our competitive gaps are	**Category**
What's trending right now	**Culture**
What formats are emerging	**Culture**
What customers complain about	**Customer**
What customers love	**Customer**
What's actually converting	**Performance**
Where to reallocate budget	**Performance**

Which Query Type?

I want to see...	Use Query Type
Distribution across a dimension	distribution

I want to see...	Use Query Type
Side-by-side brand comparison	compare
Where we're under-indexed	gaps
What we're missing entirely	whitespace
What's rising or falling	trends
How two dimensions interact	crossDimension
My own taxonomy applied	label
Top performing examples	topItems

Authentication

```bash
curl -X POST "https://api.adology.com/v1/intelligence" \
  -H "Authorization: Bearer YOUR_API_KEY" \
  -H "Content-Type: application/json" \
  -d '{
    "knowledgeSetId": "ks_abc123",
    "voice": "category",
    "query": {"type": "distribution", "dimension": "HookPrimaryCategory"}
  }'
```

Get Started

Ready to power your tools with competitive intelligence?

1. **Get API access** — Contact james@getadology.com
2. **Define your knowledge set** — Tell us your brand, competitors, and categories
3. **Choose your tier** — Raw data, intelligence queries, or agent access
4. **Start building** — We'll help you integrate

Already have a use case in mind? Describe what you're building and we'll show you exactly how to query for it.

Contact: james@getadology.com

Appendix: All Dimensions

Category	Dimensions
Hook	HookPrimaryCategory, HookSecondaryCategory, HookDescription, VideoMechanism
Execution	ExecutionStyle, Format, Pacing, Duration, AspectRatio
Emotional	EmotionalTone, ToneOfVoice, PrimaryEmotion, EmotionalIntensity
Visual	VisualMood, SettingType, PrimaryColors, LightingStyle
Messaging	PrimaryMessage, CallToAction, ValueProposition
Audience	TargetDemo, CategoryEntryPoints, ConsumptionOccasion
Custom	User.YourLabelName (any taxonomy you define)

Appendix: All Metrics

Metric	Description
count	Number of items
share	Percentage of total
performanceIndex	Performance relative to average (1.0 = average)
avgPersistence	Average days active
avgEngagement	Average total engagement
trend	Change vs prior period
velocity	Rate of change
roas	Return on ad spend (Performance voice)

Metric	Description
cpa	Cost per acquisition (Performance voice)
sentiment	Average sentiment score (Customer voice)
